

FOIA Request 2018-007910

6-18-2018

Enrique,

We received this FOIA request from the San Francisco Chronicle:

“all EPA comments from 2017 and 2018 that are related to the cleanup of Hunters Point Naval Shipyard in San Francisco, California. This request includes EPA comments on U.S. Navy draft radiological data evaluation findings for all parcels and buildings at Hunters Point Shipyard, including but not limited to Parcels B, C, D, E, F, G, UC-1, UC-2, UC-3, and building sites. Again, this request is for evaluations done on the cleanup of soil, buildings and any other aspects that were reviewed.”

We have already provided all the radiological comments as part of the response to an earlier FOIA request from Greenaction. For this new request, we are adding the non-radiological comments.

All documents have already been shared externally except the redacted file. Brianna found two portions need to be protected as enforcement confidential.

The attached lists all responsive documents in this second installment. Here are highlights of issues that are included, which are the same as those for the previous Greenaction responses:

1. Navy's 4/16/18 Clarification Proposal for 12 mrem/yr
2. Polonium-210 found on bollards at Parcel D-2 by contractor Gilbane

Please let me know anything else you may need.

John
